Hoop Skirts.

NEW SKIRT FOR 1866. The Great Invention of the Age in

The Great Invention of the Age in
HOOP SKIRTS.
J. W. Bradley's New Patent Dunlex Edipole
(or double) Spring Skirt.
The invention consists of Daplex (or two)
Ediptic Pure Reflect Steel Carthus, incomiously
braided tightly and firmly together, edge to
edg , making the toughest, most indexible, classic, and durable Spring ever used. They
setdom bend or break, like the single springs,
and consequently preserve their perfect and
beautiful shape more than twice as long as any
single spring skirt that ever has or can be
made.

The wonderful flexibility and great comfort The worderful accounty and great comfor-and pleasure to any lady weating the Duplex Ell pile Skirt will be experienced particularly in all crowded assembler, operas, carriages, ra Iroad cars, church pews, arm chairs, for promenade and bense dress, as the skirt can be folded when in use to eccupy a small place as easily and conveniently as a side or remain dress.

A lady having enjoyed the pleasure, comfert,

A lady having enjoyed the pleasure, comfert, and great convenience of wearing the Duplex Elliptic Steel Spring Shirt for a single day will never afterwards dispense with their use. For children, Misses and young ladies they are superior to all others.

The hoops are covered with two ply double twisted threadand will wear twice as long as the single years covering which is used on all Single Steel Hoop Skirts. The three bottom rads on every Shirt are also double steel, and twice or double covered to preve at the covering from wearing off the role when dragging down stairs, stone steps, etc., etc., which they are constantly subject to when in use.

All are made of the new and elegant corded tapes, and are the best quality in every part, giving to the wearer the most graceful and perfect shape possible, and are unquestionably the lightest, most durable, comfortable and seconomical skirt ever made.

THE MODEL SEWING MACHNE.

Prominent among the mechanical tri-

umphs of this most ingenious age, common honesty compels us to notice the Em-pire Sewing Machine, commended as justly styled perfection itself. Useful as have been the various sewing machines, from time to time presented to the jublic, each one of them has been cursed with some radical defect, which detracts from general utility. Warned by the experience of his predecessors, the inventor of the Empire Muchine has produced an instrument, combining all the advantages for which others are vaunted and obviating every defect which can be attributed to them by the

most fastidious critic. The Empire Macnine is a marvellous combination of simplicity, economy and perfect workmanship, being durable, free from a li-bility to get out of order, noiseless, and ensy of operation. Its mechanical contin vance is such as to secure stability, free dom from accident, and accuracy as to workmanship By the use of the patented shuttle and straight needle it makes a stitch, which can neither rip nor ravelwhile, at the same time, it can operate perfectly upon every species of material from leather to combric, with threads of cotton, linen or silk, from the finest to the

coarsest number. As the Empire Machine is gradually supplanting its more antique rivals, no one in want of a more useful jestrument of this description, be he or she tailor. coachmaker, dressmaker or seamstress, can dn otherwise than secure of these economical and inimitable machines, suited alike for family and manufacturing purposes .-The office of the Empire Manufacturing Co. is at No. 536 Broadway, New York City, where they are now supplying these Empire Machines at prices for below thk real value of the instruments .- New Yor
